

of all the candidates, etc. in the issue I'll be putting out that weekend, and set dates for elections, electoral college voting, assumption of office, and so on.

Speaking of the CDO, no one wants the \$140.00 donated by INFIDEL's subscribers. I'm not even sure participants in the Prize Game, ripped off by someone unmentionable, want a share of it. Custodians have turned down or ignored my suggestions that some of it be used to offset their expenses. I guess I'll pass that item on to my successor and let him figure out what to do with it.

I usually reserve the Dip SIG news for DIPLOMAG, but this is important and next issue of DIPLOMAG isn't due out for another six weeks or so. Keith Sesler, on learning of Glenn Overby's reluctance to part with SIG records and funds, paid Glenn a little visit and actually managed to extract the records, and a promise to mail the funds to Ed Bapple very soon. Thanks Keith. A lot of collection agencies could use someone with your talents. This doesn't change my (very low) opinion of Glenn who told me to my face in Baltimore last July that all this was "already taken care of." Still, glad to see something happening in that sad affair. If Glenn does send Ed the money, our new DIPLOMAG editor, Bruce Poppe, won't have to scrimp on every issue to avoid bankruptcy like I did.

WIESMARK DIP-PRESS, issue #0, has just arrived. Canada's latest contribution to the Dippy world, WDP is put out by Anwyl of Weismark, Weismark Publishing, E-6 Pinewood Avenue, Toronto, Ontario M6C 2V1. Subs 10/ \$7.50 in Canada, \$8.50 in the USA, and \$12.00 elsewhere. All amounts are in Canadian funds. If you want to get into a game these days, this is your best bet, as he has lots of openings. Game fee \$5.00 CDN.

Anwyl is a good friend of Dave Carter's—which may or may not be a recommendation. Sorry, Dave, I told myself I would be nice to you this month because you didn't say anything nasty about me in SLEEPLESS KNIGHTS #20 and you haven't used "standbys" for a long time. Plug: SLEEPLESS KNIGHTS, banned in Stoney Creek, Hamilton, & Dundas, is Canada's ~~funniest~~, ~~best~~, ~~cheapest~~, cheapest zine. (I knew the word would come to me.) Try 118 Horsham Ave., Willowdale, Ontario M2N 1Z9. (Willowdale is a pseudonym for Toronto.) 3 issues/ \$2.00.

Another pubber who sometimes lives in Toronto, Steve Hutton, has agreed to GM Randolph Smyth's games for a few months while Randolph takes advantage of the government's largess to take courses in Ontario. Steve could probably use standbys, so write him, very soon, at 11 Nealon Ave., Toronto, Ontario, M4K 1Y8. If you wait too long, NO FIXED ADDRESS will have wandered off to another location. Subs 10/ \$6.50 in Canada, \$6.00 US in the US, \$7.00 US elsewhere.

Randolph Smyth's FOL SI FIE will be in suspended animation for a few months, as mentioned above. A horrible thought has occurred to me: when Randolph is taking his courses, all English pubbers in Canada will be in Ontario. Enough to make me want to emigrate to New Brunswick!

Rules

V. UNDERLYING ECONOMIC STRUCTURE OF THE GAME (SUPPLY CENTRES)

This rule describes supply centres, how they are designated, "Each of these provinces produces supplies sufficient to keep an army or fleet in being," that a country is entitled to the number of units equal to the number of supply centres it controls, and that he loses and gains in accordance with them.

Interesting to note that all home supply centres are cities, and the twelve neutral centres are countries. The non-supply areas are the only ones which can be described as "provinces," yet that term is used throughout the rule book to refer to all land areas. That doesn't mean anything, but there's not much one can say about this rule.

Thirty-four supply centres is a reasonable number for seven players. If divided evenly, each power should have 4.86 centres. Mention that next time an ally wants support into a fifth centre. Of course, the fewer powers left, the greater number you should have to be "even." Maybe that should be considered in draw votes, but then, centres aren't everything.

The premise behind the supply centre idea is that control of certain areas would make the material and services of that area available to you, adding to your economic situation to enable you to pay for more armies and fleets. Deficit financing wasn't very popular then so you had to actually have the resources. In reality, though, Austria would probably expend so much energy just holding onto Serbia, it would hardly enable her to raise another army.

But the possibility of growth is an interesting concept for a game. In many games, like chess, each side begins with an equal setup and then loses units. The idea is to lose less than the other guy. Diplomacy is much more dynamic in that regard. A power can have nine units on the board one year, three a few years later, and still come back and win. One can afford to give up units in exchange for tactical advantage, then recoup the losses later. In chess if you gave up a rook to gain a section of the board, you'd never get the rook back. The ebb and flow of different colours across a Diplomacy board at least makes interesting patterns to watch.

Travel

OAKLAND, CALIFORNIA

Sitting on a wooden bench outside the hostel as the sun set, waiting for it to open. Scruffy young people drifted in, alone and in pairs, most sitting quietly, staring into space. A few entered into animated conversations with people they obviously knew. I guessed most of them were students from local universities returning after a summer's travels.

Finally a young man who looked like he had been saved more than the usual number of times unlocked the door and allowed us to shuffle in. For some reason I was reminded of Salvation Army lines. He took down data like name and origins and asked for a dollar. If you didn't have the dollar you could work it off by cleaning the place up. He demanded the knife I was wearing. Again, I reacted with incredulity. He put it to me straight: give him the knife or find somewhere else to sleep.

The hostel was divided into two barracks: one for males, the other for single females and couples. There was a small ante-room with a couch, chairs, and TV set where everyone gathered. No one was interested in talking with me; I wasn't much interested in talking with them. So about ten I decided to go out to eat. I asked the born-again Christian guarding the front door where I could go. He looked very worried, but told me there was a MacDonald's a few blocks away. "I better give you your knife back," he said. "Why for?" He told me it was a rough area and people simply didn't go out at night. Damned if I was going to walk around in civilization armed. The knife was for camping out, not for dealing with muggers.

It was dark and spooky out; no street lighting, gutted buildings looming into blackness. I didn't see anyone. The MacDonald's

Inge Davis' questions about Canadians' blubber-eating habits prompted me to think of some lesser known and equally odd delicacies I've sampled. One dish which sticks in my mind (not to mention my craw) is cod tongues. I was introduced to this particularly odd repast when visiting an ex-university-roommate in St. John's, Newfoundland.

St. John's is, of course, Newfoundland's provincial capital. The city has sprung up around what must be the world's most remarkable natural harbour. Two tall cliffs rise from the rough Atlantic waves, leaving a passage barely wide enough for a ship to pass into the calm bay beyond. The city itself creeps up the surrounding hills in row upon row of wooden frame houses painted in a wide variety of pastels. Sprinkled among these are a few in darker greens and browns, making the whole appear like a giant kalidoscope whose focal point is the jumble of ships in port.

Dominating one hillside is the Roman Catholic cathedral, an imposing monument to the fishermen's faith. The building is as beautiful inside as it is impressive out. Many of the most lovely adornments have been donated by the Portugese "White Fleet" (so named for the colour of the ships and sails) which visit St. John's every summer.

I visited in March of 1973, and was given a royal tour by my girlfriend. There simply isn't enough space here to describe the number of things to see and do in either the city or the province. It was my friend's mother who fed me the cod tongues. The whole family was trying hard to introduce me to Newfoundland traditions.

You may already know that cod, like any other true fish, have no tongues. What are called "cod tongues" are really the cheeks of the fish. They are served fried, usually accompanied by fried brewis (pronounced "brews").

Although I am a seafood lover, I couldn't choke down more than one mouthful. Cod tongues are not very fleshy; rather, they appear very gelatinous, glistening with fatty particles. I knew then and there that I'd never pass my honorary Newfoundlander initiation.

On the other hand, I really enjoyed the brewis. Brewis is hardtack (ship's biscuit). To fry the stuff, you soak it overnight in milk and crumble it into the skillet. It looks and tastes much like crumbled pancake, although somewhat less sweet. Bacon and brewis for breakfast is terrific. If you can find a store that stocks brewis, and enjoy trying unusual foods, I'd recommend you try it. It might even become a staple of your diet!

Someday, I hope to go back to Newfoundland on vacation. There's so much more there that I'd like to see — particularly the excavations at L'Anse aux Meadows where a Viking colony has been uncovered. When I go, you may be sure that I'll be feasting on all the local bounty of seafood -- all, that is, except cod tongues.

Will Scott Hanson, 939 18th Ave., SE, Minneapolis, MN 55414
please submit standby orders for Turkey? Thanks, Scott, I'll
send you the addresses.

To those who inquired, submitting joint orders is perfectly legal according to my house rules. When someone sends you his orders, or part of them, for you to fill in blanks, you should sign them too, but the original player may still submit amended orders over-riding the joint set.

For the first time I received a set of orders which I have very good reason to believe are forged. If the party behind them is ever uncovered he will immediately be expelled from the game. Be warned. Because of this, I am requesting that all players in this game use their player codes (I'm sending reminders with this issue) on all correspondence. I am changing some player codes and strongly urge everyone never to reveal their code to another player.

I notice a number of you haven't renewed your SIG membership. That means you're unaware that DIPLOMAG has a new editor and you missed getting last issue with a very fine strategy article. (Who said I had to be humble?) Please send Ed your \$4.00 soon.

NOTES: Once again, in the parent game, we have a retreat due which could change the supply centre chart, on which your "game effect" is based; however, the retreat can have no effect on the CMP here, as calculations are made before retreats.

Some of you are still having problems remembering that one cannot sell more than 500 units per turn. There's a good reason for this rule; it prevents total chaos in the market and forces you to plan ahead.

By the way, Dan has NMRed out in his last game in SNAFU! His portfolio here (SBA) has been inactive for quite some time, so SBA will most likely be removed from the listings next time.

was a bright oasis of plastic glitter with a handful of cust-
omers. When I returned a few people expressed surprise that
I actually went out in the dark. I snapped that I got over my
fear of the dark when I was three years old. I wasn't feeling
too friendly.

Lying in my bunk that night I realized why: I was homesick.
Sick of people with funny accents, sick of their paranoia, sick
of wandering around with no sense of direction, just sick of
strangeness. It was over three thousand miles home. What if I
got sick, or hurt? What if the car gave out? A couple in the
other barracks were grunting and moaning and a skinny fellow
in the next bunk was up on tiptoe peering over the partition.
I guess it was sort of funny, but I was in a real blue funk.
"Knock it off man," I growled. "Screw you," he snapped and
went back to watching. Then it started to grow in me: a
laugh bubbled up from deep inside. It was funny: I came all
this way and that was the conversation at the end of the road.
I was going to head home in the morning. I don't recall if I
dreamed of pine trees that night, but it would have been
appropriate.

Sevastopol ((Turkey)): TSAR KILLED!

After a prolonged struggle involving land and sea elements of the Turkish Empire, Sevastopol was regained for Tzar Thomas. During the ceremonies marking the capitulation of the city to its rightful sovereign a group of madmen, dressed as Orthodox priests, assassinated the Tzar and a large group of nobles and attendants using a cart-bomb.

The Sublime Porte has declared a ten-day mourning period throughout the Empire and has given permission for the Turkish forces to raise the black flag against all remaining Russian forces until such a time as Russia is reduced to begging for forgiveness for the dastardy takeover by the evil one.

The Sublime Porte also invites all legitimate relatives of the Tzar (long may Allah sing his praises) to the city of Sevastopol.

Olsen to Duncan and Swider: Hey listen, if Tom wants this position back all he has to do is ask! I'm very reasonable!

1976 CX - Orphan 6

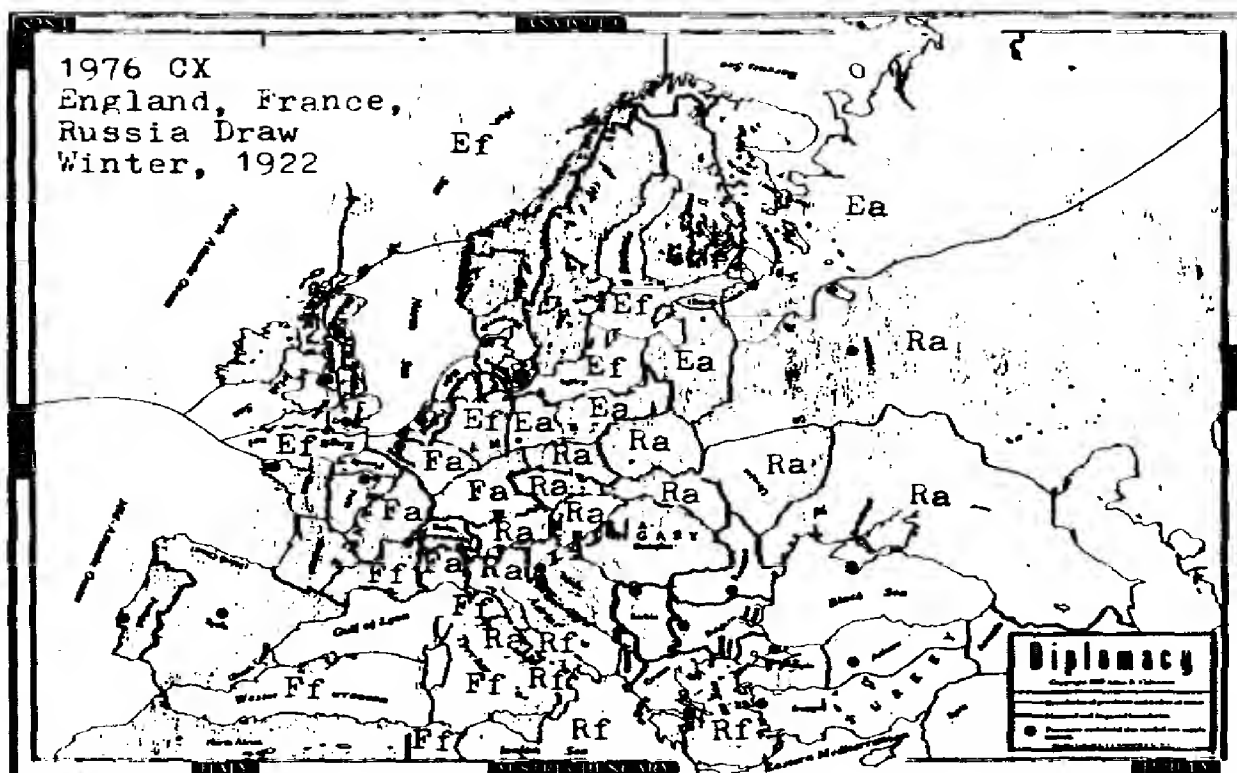

WINTER, 1922: THE DRAW PASSES & EVERYONE VOTED!

England (Steve Berrigan), France (John Davies), and Russia (Steve Hutton) opted to end this game by sharing a draw. The last item is that France built a F Marseilles, the other two having no builds they could make. Eric Kirchner sent orders last season, arriving too late, with a note that he was resigning. However, he had already been replaced.

I wonder if this game sets a record? It's 6 1/2 - 7 years old—which is a fair bit of time. The stats tell an amazing story of how custodians keep games going despite many changes of personnel. Only one player lasted from the beginning until his elimination—Bob Acheson. Both Steves have played for over half the length of the game, and John Davies took part in a draw by playing only two seasons.

Steve Hutton mentioned that a concession to Russia was proposed in Winter, 04 (July 31, 1977). Not knowing what moves were made, I assume an unstable stalemate line was set up early and held all game. Must have been frustrating for the Russian player to be so close to a win for so long.

End game statements are welcome for next issue. (I just hope they're not as long as this game!)

Spring, 1901 due Friday, 29 April, 1983.

NOTES: Countries were assigned by preference lists, as shown, or random for those who didn't submit them. Trust all are okay? I don't know what happened to Bucheron Frank or Sellick Davies, as they were both very enthusiastic, but I haven't heard from either since November, despite all the free issues and notes I sent them.

Please note that Randolph will be taking courses away from home from mid-March until July. We don't yet know his address and I understand he may be moving about during those months, so if any of you wish to write him after the beginning of March you can send your letter to me and I'll forward it.

Anyhow, no one said he was opposed to using the European system of combining seasons, often called "Prophetic retreats." That means you'll have to send retreats with your spring moves, and retreats and builds with your fall moves.

On what to do with dislodged units lacking retreat orders, the consensus seems to favour using Just's Right Hand Rule. Okay. If you're unfamiliar with it, it goes like this: when a unit is dislodged, it will be retreated to the space to the right of the attacking unit. If that is not possible, it will retreat to the space to the left. One keeps this up until a legal retreat is found. If you list your preferred order of retreats for any units which could possibly be dislodged, then we shouldn't have to use this rule.

Regarding standbys, I have received an appeal to use them, even if it means violating the Seven Nations aspect. Alright. I will try to line up standbys from various countries (thanks, to those who suggested names of those who may be interested). If I do, have to use standbys from North America, I'll keep them as far apart geographically as possible.

Good luck to all, and to all a good fight!

1982 J CONTINUED

Vatican City: His Supreme Absurdness, Pope George Ringo II, was reported to be in a state of shock over the poor quality press seen so far in this game. "Quantity, yes, but no substance. That crazy Ibn-Whatisface-Duncan spouts drivel which makes no sense, and not only that but we have to read it two seasons in a row. It's not like it used to be. I remember the stories my daddy, Pope George Ringo I, told me about '76IJ. Now there was a press war! Seething tirades, personal attacks, character assassinations (and if you order now, we'll throw in six steak knives at no extra cost). Ah, for the good old days."

Russia to Turkey: I just noticed that your initials are DD (okay, I'm not the swiftest). Does this mean you are Mark Berch?

PRESS

Rome: It has been learned that Italian Emissaries have been denied diplomatic immunity by the Turkish government and are believed to be imprisoned. The Italian government requires the return of its diplomats as a prerequisite for the establishment of normal relations with his "wholeness," the Sultan of Turkey.

Austria: The Grand Duke of Austria-Hungary wishes to announce the start of his holy war against the infidel Ottomans. The only thing that an ottoman is good for is as something upon which to place one's behind.

Russia: Reports of a gold rush in Moscow seem to be unfounded. Even his most noble majesty, Nelson Ivegotonich Millarov, has been seen roaming the Russian countryside ranting, "Where are those mines? Where? Where?" Some unfaithful citizens have suggested that he try Siberia.

Turkey to Russia: Actually, I lied! It's Armenia that I mined!

Venice to Triest: Thanks, You were right.

They put to sea,
 Seafarers three,
 To see what they might find.

The move was free
 As it could be,
 Until they tripped a mine.

France: Sorry about the NMR. I did mail orders on January 6. That would have been enough time in the past, but I've been getting really lousy mail service recently.

Rome: Rumors abound in Vatican City that his "Wholeness" has been overheard late at night in the mystical Hall of Thought conversing with the shades of the Ancient Wholy Roman Empire.

France to Neighbors: The French coastline is very dangerous. We highly recommend you keep your fleets very far away.

Letters

I occasionally get suggestions from players suggesting changes to the way I handle things. All players have received a sheet listing changes to house rules which have resulted from some of these suggestions. I've faced something of a fuss over people overlooking draw and concession votes lately, so Rick Young sent this suggestion:

"Perhaps in future you could give those who fail to send in votes which are critical to the conclusion of a game the same kind of insurance you give to those who fail to send in orders. 'NVR Insurance.'"

Absolutely and unequivocally NO. If a player's orders arrived on time there is no reason why his votes couldn't arrive at the same time. And, if I started calling when players overlooked votes, why shouldn't I call when a player misorders, or doesn't order, a unit? Where is the limit? I am not responsible when players fail to read an entire game report or have a lapse of memory when writing their orders. I have bitched and complained often enough about players not voting on draws and concessions, but no matter what I say or how many games end with the majority of players not voting, it has no effect at all. In a recent case where a player complained about a draw vote passing, a proposal was put forward in another game the next season and he didn't vote that time either. I think there's a certain confusion here about the extent of a GM's responsibilities. Whatever the players say, or don't say, on the deadline is what has to stand—or else the entire system breaks down into chaos. It is the GM's responsibility to report the situation as it stands on the deadline. I am not required by any convention in the hobby to offer NMR Insurance—and if the revision to its regulations, which players should have received, does not solve the problems it has created, I will drop it altogether.

On the American inability to distinguish the words "check" and "cheque," Bruce Pope wrote: "250 million Americans can't all be wrong." Oh yeah? When the USA was still part of the civilized world, they used to brew tea with cold salt water. Small wonder Britain was willing to let them go their own foolish way. But don't expect the rest of us to follow your errors.

Ben Schilling says: "U.E.L.? One of my ancestors (William Williams) signed the Declaration of Independance." I'm telling you, you guys will rue the day you left the Empire.

Darryl Phillips adds a few words to the great American-Canadian feud: "Not all Mericans panic at a mere 0° C. People from Wisc & Minnesota generally don't come alive until 0° F (-17.777778° C). Are you refering to 40 below with or without windchill? -20° F is great. Unfortunately we had a warm December; I don't think it got below 5° below F."

You too eh? Here I thought the Americans had stolen winter from us, as it just didn't happen here--yet. Record highs and very little snow. By rights Minnesota and Wisconsin should be part of Canada: they've the proper attitude towards the weather. The coldest I ever experienced was -100° F (with windchill) in
